

Description

The **FIREKILL™** Model HS43-120 is a high-speed water spray nozzle which delivers a full cone spray of water from the nozzle in an angle of $120^\circ \pm 5\%$. The nozzles functions with a water pressures of 2-10 bar making it possible to utilize the nozzles in very harsh wind conditions.

Model HS43-120 Nozzles have a K-factor of $42.5 \pm 5\%$ (liter/minute/ $\sqrt{\text{bar}}$).

Model HS43-120 High Speed Nozzles are available with 1" BSP & NPT male connections.

Model HS43-120 High Speed Nozzles are available with (FM Approved version) and without nozzle strainers. Nozzle strainers have 2mm mesh size.

All internal water ways have diameters larger than 3mm. Nozzles should only be utilized in pipe systems with clean internal pipe surfaces and cavities. Nozzles should be installed in systems with a main-line water strainer with mesh size equal to or less than 3mm.

Applications

The Model HS43-120 nozzle is designed for fire protection and cooling of primarily tanks, building and structures against hydrocarbon fires.

Approvals

The Model HS43-120 Titanium and Naval Brass nozzles are FM approved.
